Dear Sareena,

Thank you for considering Flarize for your home.

Choosing solar is one of the smartest decisions you can make for your home. It's more than reducing your electricity bill—it's about enjoying a better lifestyle, protecting your family from rising electricity costs, and investing in a home that continues to reward you for years to come.

We've carefully designed this solution specifically for your home's energy needs, so you can make your decision with complete confidence.

Warm Regards,
Team Flarize

Homeowners Around You Have Already Switched to Solar

While you're still paying full KSEB bills every month

12 homes in Alappuzha (688008) are already running on Flarize solar. 43 installations across Alappuzha district in 2025 alone.

""The solar panel installation process was smooth from the very beginning. The team clearly explained each stage—from understanding our energy needs to system design, installation, and final activation. All timelines were communicated in advance, and the execution stayed on track without unnecessary delays. The overall experience felt well-planned and dependable."."

~~₹3,200~~ → ₹200

Saves ₹2,900/mo

"Our commercial solar installation brought better predictability to our monthly power expenses. The team maintained transparent communication throughout the project and handled the technical and approval processes professionally. The transition to solar was structured, efficient, and free from operational disruption, which made the decision feel reassuring"

~~₹3,200~~ → ₹200

Saves ₹2,900/mo

"What stood out most was the honest guidance we received on system capacity and realistic expectations around savings. The team took time to explain what would work best for our usage rather than overselling. From planning to completion, the project felt reliable, transparent, and well managed."

~~₹3,200~~ → ₹200

Saves ₹2,900/mo

From Booking to Savings — Step by Step

1 DAYS

Pay ₹5,000 – Slot Locked

Lock your installation slot with a small booking fee and we'll begin the technical assessment right away.

3-4 DAYS

Site Inspection & Documentation

Our team visits your site to evaluate roof, wiring, and shading. All measurements and documentation are managed by us.

5-7 DAYS

Payment and Material Delivery

Deliver solar panel, inverters and structures; follow up with the next payment installation (80% loan amount)

9-13 DAYS

Installation

We handle the full installation and system integration. Once commissioned, your solar system begins producing clean energy.

14 DAYS

Commissioning and Customer Orientation

Commission the system and orient the customer on operation and maintenance.

15-17 DAYS

Net Meter Installation and Activation

Install net meter for grid integration, enabling the customer to start using solar power

REFUND FROM KSEB

(80% of Pre-tax value of registration fee) (1000 per kw + 18% tax)

5kw - Rs 4000

WHAT WE HANDLE

- Design the panels according to site-specific requirements
- Analyze the site for shading and optimize panel placement
- Procure Solar Panels, Inverter, Structure and BOQ according to project requirements
- Install all required components, fittings, and equipment
- Test and commission the solar power plant, Invite authorities for final approval before commissioning
- Installation scope is limited to the DC side; solar meter installation is included
- Train client's personal on system operation, safety, and maintenance

WHAT YOU NEED TO DO

- Provide a shade-free roof area and a safe, weather-protected space for the inverter.
- Arrange basic installation support, including water, electricity, storage space, and site access.
- Provide necessary technical provisions such as internet connectivity, termination points, CT/AC components, and upgrades required for HT or generator setups.
- Complete any KSEB-related requirements, including net metering formalities, load enhancement, consumer name change, ownership transfer, or other utility-related modifications, if applicable.
- Pay applicable statutory fees, deposits, registration charges, and other charges imposed by KSEB or relevant authorities.
- Any civil work, roof repairs, waterproofing, structural modifications, trenching, masonry work, painting, restoration work, or additional structural work required for installation shall be under the customer's scope unless specifically included in the quotation.

Terms and Conditions

1. Warranty :

Golden Ray Renewable Energy provides a five (5) year warranty for the complete solar power system against manufacturing and technical defects, subject to the terms and conditions mentioned herein. Solar panels, inverters, and other OEM products shall carry warranty coverage as provided by their respective manufacturers.

2. Warranty Exclusions :

The warranty shall not apply to defects or damages resulting from misuse, negligence, unauthorized modifications, third-party interference, improper operation, storage, or maintenance. Warranty coverage also excludes damage caused by accidents, natural calamities, lightning, flooding, landslides, external grid surges, or any other Force Majeure events.

3. Consumables :

Consumable and protective components such as Fuses, Surge Protection Devices (SPDs), connectors, and similar accessories are not covered under warranty and may require periodic replacement as part of normal maintenance.

4. Customer Responsibilities :

The customer shall provide a shade-free area suitable for solar panel installation along with adequate space for inverters, meters, and associated equipment. Water access for panel cleaning, site accessibility, internet connectivity for monitoring systems, and any loading or unloading arrangements at site shall be arranged by the customer. If vehicle access to the installation site is restricted or unavailable, the customer shall arrange the necessary manpower or alternate transportation required for material movement, installation, servicing, or maintenance activities. Any additional costs arising due to restricted site access shall be borne by the customer.

5. Service & Training :

Basic service and maintenance training shall be provided to the customer at the time of commissioning. Standby inverter support may be provided during inverter repair periods, subject to availability.

6. Payment Terms :

Payments shall be made as per the payment schedule agreed in the quotation and are due immediately upon completion of each project stage. In case the project duration is extended, invoices for completed work, supplied materials, or specially ordered materials may be raised periodically and shall be payable upon receipt. Any additional charges arising from scope changes, statutory requirements, material variations, or customer-requested modifications shall be paid before the related work is undertaken. The agreed project price shall be considered final upon acceptance of the quotation and requests for price reductions, discounts, or renegotiation after order confirmation shall not be entertained. Payments shall be made only to the official bank account of Golden Ray Renewable Energy, and the Company shall not be responsible for payments made to employee or third-party accounts. Eligible refunds shall be processed within seven (7) working days, subject to banking procedures.

7. Price Variations :

If payments are not made as agreed, any increase in labour costs, material costs, taxes, duties, or statutory charges occurring after the quotation date may be charged additionally to the customer. Such revisions shall be reflected in the final invoice.

8. GST & Tax Changes :

Prices quoted are inclusive of applicable GST and taxes prevailing on the date of quotation. Any revision in GST, government levies, duties, or statutory charges shall be reflected in the final invoice.

9. System Capacity & Product Confirmation:

Once the customer confirms the system capacity, panel make/model, inverter make/model, and quotation, subsequent changes may not be possible. Any changes requested thereafter may result in revised pricing, additional charges, material replacement costs, or project delays.

10. Project Completion Timeline :

The Company shall endeavour to complete the project within the timeline specified in the quotation or within a reasonable period where no timeline is specified. However, the Company shall not be responsible for delays caused by approvals, shipment delays, transportation issues, weather conditions, or other factors beyond its reasonable control.

11. Statutory & KSEB Related Scope :

Golden Ray Renewable Energy shall assist with statutory approvals and KSEB-related procedures as applicable. Any charges, deposits, penalties, load enhancement costs, tariff changes, name changes, ownership transfers, meter shifting, or similar modifications shall be borne by the customer.

12. Government Subsidy Disclaimer :

Government subsidy schemes, eligibility criteria, approval procedures, and reimbursement timelines are governed by the respective authorities and may change without prior notice. The Company shall not be responsible for delays, rejections, policy changes, reduction in subsidy amount, or subsidy disbursement timelines.

13. Data Privacy :

The Company reserves the right to monitor, record, and utilize customer information and solar production data obtained directly from the system or through remote monitoring platforms. Such information may be shared with vendors, technical support teams, regulatory authorities, and other relevant agencies for warranty support, compliance requirements, research, service improvement, and promotional activities.

14. Additional Expenses & Civil Works :

Unless specifically included in the quotation, charges relating to KSEB applications, registration, documentation, testing, agreements, net meter connections, additional structures, extended cable runs, site-specific modifications, and any civil work including foundation work, roof repairs, waterproofing, structural modifications, masonry work, painting, trenching, cutting, restoration work, or related activities shall be borne by the customer.

15. Retention of Title :

All materials, equipment, and goods supplied by the Company shall remain its property until full payment has been received and all outstanding dues have been cleared. Ownership shall transfer to the customer only upon complete settlement of outstanding dues.

16. Liability :

The Company shall not be liable for business interruption, loss of profit, loss of savings, or any indirect or consequential damages arising from the use or performance of the solar power system. Claims arising from non-compliance with operating, maintenance, or installation instructions shall also be excluded.

17. Force Majeure :

The Company shall not be liable for delays or failure to perform its obligations due to circumstances beyond its reasonable control. Such circumstances include natural disasters, strikes, transportation disruptions, utility delays, government actions, regulatory changes, or other Force Majeure events.

18. Confidentiality :

Both parties shall treat all non-public commercial and technical information exchanged during the course of the project as confidential. Such information shall not be disclosed to any third party without prior written consent, except where required by law.

19. Jurisdiction :

This quotation and all related agreements shall be governed by the laws of India. Any disputes arising out of or in connection with this agreement shall be subject to the jurisdiction of the courts of Kerala.
